Summary

Frontend Developer with 4+ years of experience building enterprise web and mobile applications using React, Next.js, Angular, React Native, and TypeScript. Skilled in frontend architecture, API integration, reusable UI development, testing, deployment, and technical solution analysis across banking, telecommunications, and digital platforms. Experienced in owning features from implementation through UAT and production release while collaborating with cross-functional teams.

Experience

PT. AKO MEDIA ASIA (SALT) Jakarta Barat, Indonesia
Frontend Developer - Contract Apr 2025 – Present
- Developed and enhanced enterprise applications across TSurvey, FMC Dashboard, Digihub, and Patricia Dashboard using Angular, Next.js, TypeScript, Highcharts, and Clean Architecture.
- Built and revamped key TSurvey features including Target Respondent, Reward Management, Broadcast Management, AI-generated survey features, and Response Summary.
- Expanded TSurvey unit-test coverage from 45,000/54,000 to 50,000/54,000 statements while supporting SIT, UAT, NFT, penetration testing, and production deployment.
- Contributed to frontend architecture through design system development, Next.js project setup, reusable UI library enhancement, and technical solutioning.
- Coordinated frontend task breakdown and delivery for Patricia Dashboard, contributing to Sprint 5.1 and 5.2 releases with zero defects found during UAT.

PT. BANK CIMB NIAGA Tangerang Selatan, Indonesia
Frontend Developer - Contract Sep 2023 – Mar 2025
- Developed and enhanced Octosmart Mobile and Tablet features using React Native, including My Portfolio Search, Sunlife Report, CR Lending, and CCPL.
- Delivered CCPL Phase 1 and Phase 2 across web, mobile, and CMS using React, React Native, HTML, and CSS.
- Supported SIT, UAT, penetration testing, production deployment, and resolution of production and QA findings across banking applications.

PT. TELEKOMUNIKASI INDONESIA (TELKOM) Jakarta, Indonesia
Frontend Developer - Contract Aug 2022 – Aug 2023
- Developed and optimized CMS and landing-page applications while collaborating with backend and UI/UX teams.
- Improved Haioo.id and Indonesia Journey landing pages and developed Jest unit tests across multiple web applications, including TravelAja Mitra.

PT. CAKRA RADHA MUSTIKA Jakarta, Indonesia
Frontend Developer - Contract Mar 2022 – Jun 2022
- Developed a Loyalty CRM CMS using Next.js within 3 months, implementing TypeScript, Redux Thunk, SCSS, Tailwind CSS, and Material UI.
- Collaborated with UI/UX designers to translate product designs into production interfaces.

PT. KARSA LINTAS BUWANA Jakarta, Indonesia
Frontend Developer - Internship Aug 2021 – Feb 2022
- Developed a CMS application using Next.js within 6 months, implementing TypeScript, Redux Thunk, and SCSS.
- Collaborated with backend developers to integrate frontend features with backend and database requirements.
